Professional Summary

Senior Software Engineer with **5+ years** building scalable distributed systems and cloud-native microservices using **Java, Spring Boot, React, Kubernetes, and Azure/AWS**. Delivered **high-throughput REST APIs**, enterprise auth platforms, and CI/CD automation at scale. Strong in system design, security, and production ownership.

Experience

Matillion

Senior Software Engineer

Dec 2025 – Present

Hyderabad, India

- **Engineered** a custom **RBAC authorisation platform** using **Auth0** and **OAuth2**, enforcing multi-tenant security boundaries and significantly reducing unauthorised access vectors.
- **Led and designed** development of cloud-native **Java microservices** and micro-frontend applications powering **Matillion's** Data Productivity Cloud, serving enterprise-scale production workloads.
- **Leveraged Claude AI** to build 10+ automation skills for escalations, SSO setups, and user permission workflows across multiple platforms via MCP integrations, eliminating **60% of manual operations**.
- **Owned** delivery of high-throughput **REST APIs** using **Spring Boot** and **JPA** with strict versioning and observability, enabling reliable integration across enterprise client systems.
- **Delivered 95% test coverage** across Cypress end-to-end, unit, and integration test suites, reducing post-release defect rates and increasing deployment confidence.
- Collaborated cross-functionally on 24/7 on-call rotations, resolving critical customer incidents and driving measurable uptime improvements.

OpenText Technologies

Software Engineer

May 2021 – Nov 2025

Hyderabad, India

- Migrated a **monolithic Java 11 EJB application** to cloud-ready Spring Boot microservices on Java 21, re-architecting authentication with Spring Security, and JWT to serve enterprise-scale workloads.
- **Automated** Kubernetes **CI/CD deployments** across dev, staging, and production using Docker and GitOps, **reducing deployment failures by 40%**.
- Optimized PostgreSQL queries with Hibernate ORM and API versioning strategies, **improving query performance and reducing p99 latency**.
- Engineered reusable **React.js** component libraries and operational dashboards, accelerating frontend delivery and improving enterprise user experience.
- Served as **Security and Build Advocate** across two enterprise products by conducting architecture reviews and **mentored 3 engineers** on distributed systems and secure coding practices.

Technical Skills

Languages: Java, Python, Javascript, SQL, HTML/CSS

Frameworks: Spring Boot, Spring Security, Kafka, JPA/Hibernate, ReactJS, NodeJS

AI and Automation: Spring AI, Claude API, n8n, LLM workflow integration

Cloud Infrastructure: AWS, Docker, Kubernetes, gRPC/RESTful APIs, Microservice Architecture, AOP, Terraform, ArgoCD

Database: MSSQL, PostgreSQL, Oracle, Redis

Monitoring: Grafana, Prometheus. Flybridge, on-call incident response

Development Tools Methodology: Git, JIRA, Agile Methodology, Test-Driven Development (TDD)

Education

B.Tech in Computer Science

SRM Institute of Science and Technology

2017 – 2021

Chennai, India

Certifications

- **Microsoft Azure Fundamentals (AZ-900)**
- **AWS Certified Cloud Practitioner**

Publication

Secure E-Voting System Using Blockchain Based on Solidity Technology — Published in **AIP Publishing**.
